

HydroMat CARE & CLEANING

One of the best ways to keep HydroMat fabric looking good is to vacuum and/or hose fabrics off on a weekly basis. This helps prevent dirt from becoming deeply embedded in the fabric and eliminates the need for more vigorous cleaning. In most environments, a thorough cleaning will be required as soiling dictates. When it's time for thorough cleaning, HydroMat fabrics can be cleaned while installed.

General or Light Cleaning

To clean HydroMat:

- Brush off or vacuum loose dirt.
- For outdoor applications, use a water hose to wash away dirt and stains.
- If needed, prepare a solution of water and mild soap such as dishwashing liquid or household cleaner.
- Apply a small amount of water and soap mixture to HydroMat.
- Use a soft bristle brush to clean.
- Rinse thoroughly until all soap residue is removed.
- Air dry.
- May not require re-treatment depending on the soiling level of the fabric.

Heavy Cleaning for Stubborn Stains and Mildew

HydroMat fabrics do not promote mildew growth; however, mildew may grow on dirt and other foreign substances that are not removed from the fabric. To clean stubborn stains:

- Prepare a solution of 1 cup bleach and ¼ cup mild soap per gallon of clean water.
- Apply small amount of bleach and soap mixture.
- Blot stain with a sponge or clean towel.
- Rinse thoroughly to remove all soap residue.
- Air dry.

Remember to protect the area around your HydroMat fabric if using a bleach solution. Other fabrics that are not made by Dorsett Industries, Inc. may have an adverse reaction to the bleach.

Professional Cleaners

In evaluating the services of a professional cleaning firm, you should inquire about a firm's experience in working with HydroMat fabrics.

Helpful Hints

Always rinse HydroMat thoroughly to completely remove bleach. Please be aware of the environment. Bleach can have harmful effects on the natural environment around you. We do not advise using bleach if you are surrounded by a body of water. HydroMat should only be allowed to air dry.
