

Wash Care Instructions

Vinyl Fabrics

Use a soft, non-abrasive cloth to wipe the surface clean with water. As needed, your vinyl fabrics may be hand washed using warm water and a mild dish detergent.

For tougher stains mix a blend of 10 percent bleach and 90 percent water. Use this solution to test an inconspicuous area of your fabric to ensure there is no discoloration or damage. If you are not satisfied with the results of the solution then discontinue its use and instead use a cleaner that is specifically made for vinyl fabrics, such as 303 Multi-Surface Cleaner.

Make sure your vinyl product is dry before storing.

Do not use solvent chemicals.
